

Make a Wind Turbine

You will need:

a hole punch or sharp pencil to make the holes in your blade template

a bendy straw

paper fastener

this sheet and template printed onto card.

Method

1. Cut out the circle.
2. Cut along the bold lines.
3. Punch out the holes or pierce them with a sharp pencil.
4. Bring the holes towards the centre hole and fasten with a paper fastener.
5. Attach your wind turbine blades to the straw mast by putting the paper fastener through the hole at the end of the bendy part of the straw.
6. Bend the straw so that the blades stick out away from the mast.
7. Collect your class wind turbines together to make a wind farm.
